IT'S NOT PUTT-PUTT

Mini golf has evolved.

What used to be a simple activity is now a design-driven experience that adds value to an entire property by increasing engagement and making better use of underutilized spaces.

WHAT WE DO

At LMG, we design and build custom mini golf environments that integrate directly into your property.

Best suited for:

Golf Courses

Family entertainment venues

Hotels and resorts

Tourism and attraction-based properties

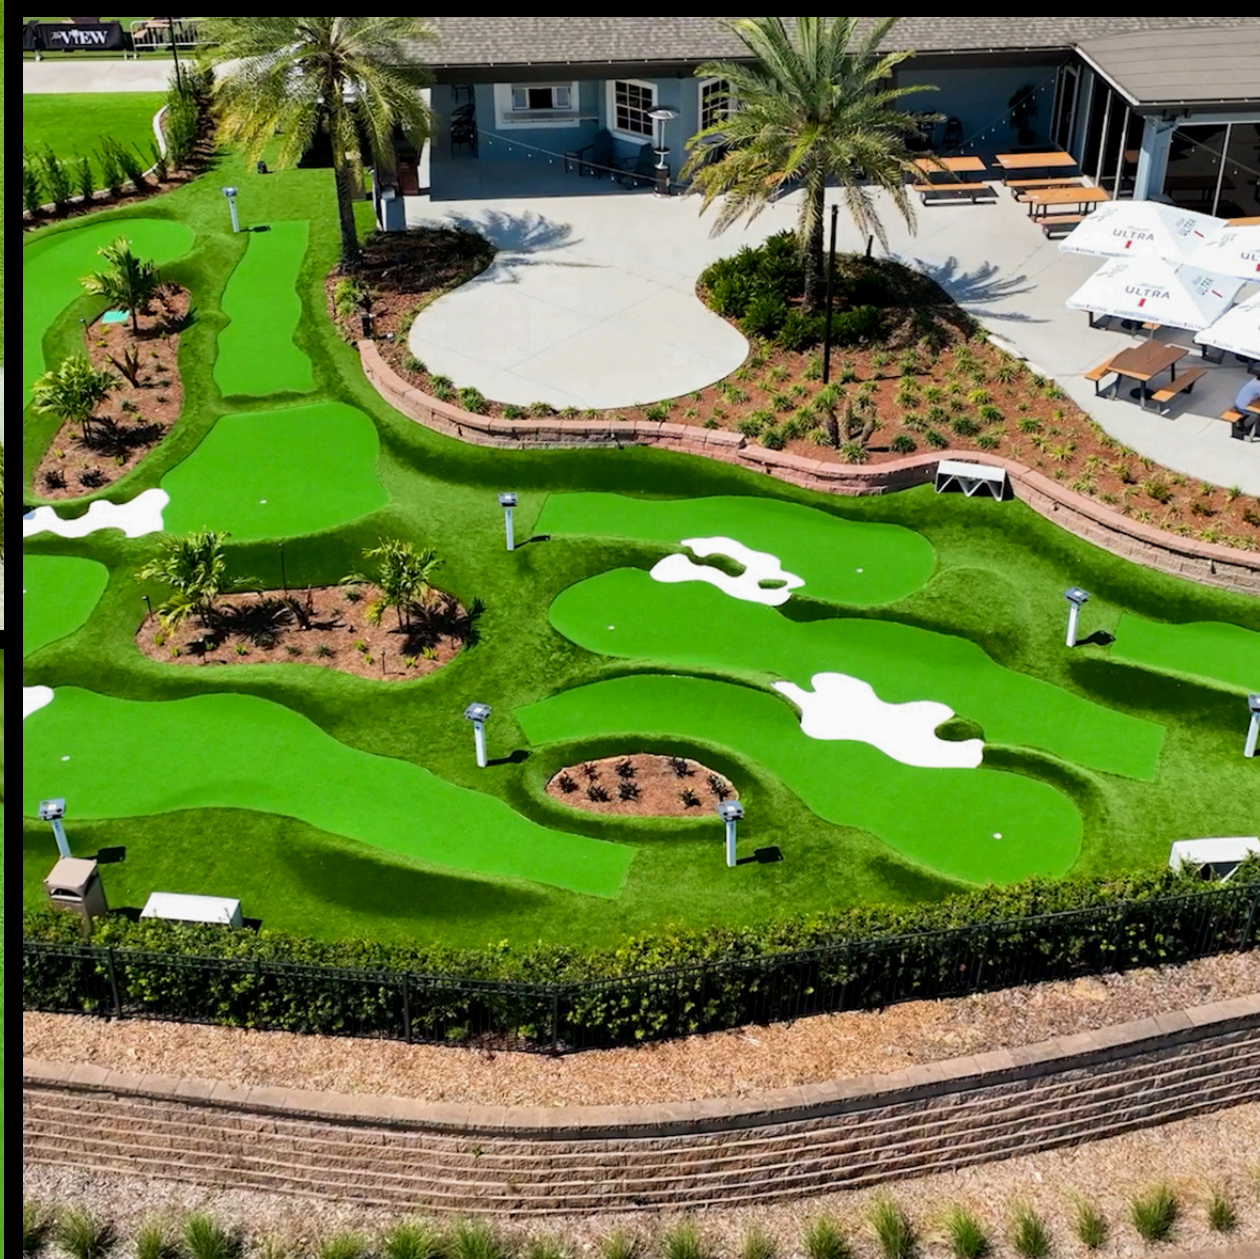

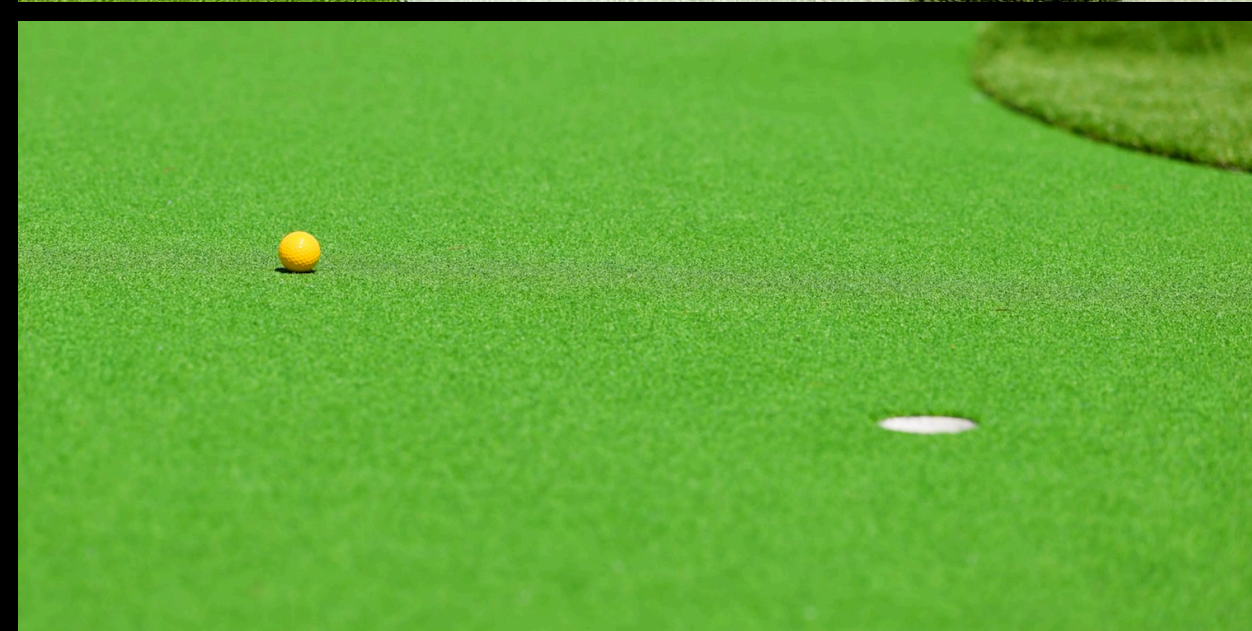

MODERN GUESTS EXPECT
MORE THAN AMENITIES...
THEY EXPECT INTERACTION.

Golf-based social entertainment has grown into a multi-billion-dollar venue category, led by operators like Topgolf **generating over \$1.8 billion annually in venue revenue.**

Smaller-format luxury mini golf environments allow hospitality and tourism properties to capture the same experiential demand **without the footprint or investment of a full driving-range concept.**

74% of travelers now prioritize experiences over material purchases when spending on travel.

— Expedia Group Media Solutions

Mini golf has become a design-driven feature that keeps guests engaged and encourages longer visits. It is an activity that appeals to all ages and creates repeat engagement for years to come.

DESIGNED TO FIT YOUR SPACE

Every layout is developed with the property in mind.

Integrated alongside existing amenities, with flexible scale from small 3-hole activations to full 18-hole courses.

The result is a feature that **fits naturally into an underutilized space**, not something added onto it.

A SIMPLE GUIDED PROCESS

1. Initial Conversation

We start with a simple discussion to understand your space, your goals, and how this feature should fit into your property.

2. Site Review

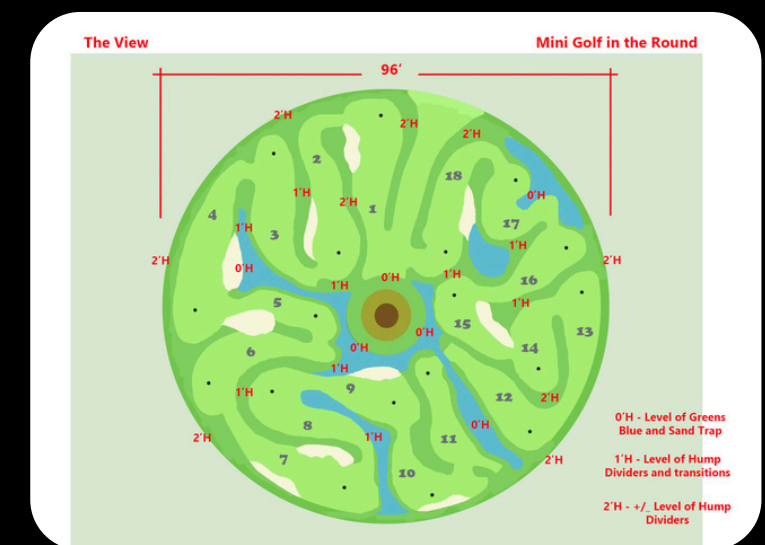

We walk the site, identify opportunities, and explore how the layout can work within the existing environment.

3. Concept Design

We develop a tailored concept that reflects your vision, your audience, and the overall feel of the property.

4. Refinement

We review the design together, make adjustments, and align on budget, scope, and timeline.

FROM CONCEPT TO COMPLETION

5. Final Planning

Once approved, we finalize the design, define the build approach, and prepare for installation.

6. Build + Installation

Our team brings the concept to life with a streamlined construction process focused on quality, durability, and detail.

7. Final Touches

We fine-tune the course, ensure everything performs as intended, and deliver a finished experience ready for use.

START THE CONVERSATION

Every project starts with a simple conversation.

We'll review your space, your goals, and identify where this could fit naturally within your property.
